Abstract (en)  
[origin: EP2085553A2] The hinge (5) has a retaining part (18) for fastening to a leaf (2) of a window, and a bolt retainer (9) connected with a support arm (15), where the support arm is designed in a L-shape and has a vertical side piece (17). The retainer is provided for retaining a bearing bolt of a corner support, and an adjusting device (22) adjusts the support arm against the part. An adjusting screw (23) for fixing a rotating tool of the adjusting device is accessible from a side of the support arm and connected to a horizontal side piece of the support arm, where the side is turned away from the retainer.
