Abstract (en)

[origin: EP2085700A2] The steamer has a cooked food conditioning device, a controlling or regulating device and a display and operating device. The cooking chamber has a horizontally extended conditioning plane. Each conditioning plane has two conditioning zones and each conditioning zone is assigned to a parameter. The display and operating device has a display field for each conditioning zone. An independent claim is included for a method for cooking cooked food in a cooking chamber of a steamer.
