Abstract (en)

[origin: WO2008062103A1] A hose holder for a dental care unit, said holder comprising a holder part (8) and a primary guide roller (7), which primary guide roller (7) together with the holder part (8) have been arranged to define such an opening (9) that a hose (10) used in connection with the dental care unit can be placed in connection with said opening and moved through it. To achieve a user-friendly holder, the hose holder (6) additionally comprises at least one lower guide roller (11, 12), which has been arranged in the hose holder (6) at a lower level than the primary guide roller (7).
