Abstract (en)
[origin: WO2008070583A2] The invention relates to compounds and their use in the treatment of thrombocytopenia resulting from diseases or conditions such as immune thrombocytopenic purpura, cancer chemotherapy, surgery, bone marrow or stem cell transplantation, radiation injury or treatment, chronic viral infection, and pancytopenia. The invention further relates to pharmaceutical compositions containing the compounds and compositions of the invention as well as methods for treating such diseases or conditions in a mammal, including a human, by administering to such mammal an effective amount of a selected thrombopoietin receptor agonist.
