Abstract (en)
[origin: WO2008043537A1] A set of blocks for constructing game assemblies for children. The set comprises basic block members (10) and complementary block members (11) that can be magnetically anchored and assembled each other; each basic block member (10) has a hollow body (18) comprising lateral faces having flat and/or shaped coupling surfaces. In turn, the complementary block members (11) comprise a hollow body (16) having lateral coupling surfaces matching with the coupling surfaces of the basic block members (10). Magnetic elements (14, 20) are fixedly or movably positioned in each basic and complementary block member (10, 11) to enable the anchorage and the assembling of the block members (10,11) during the construction of the game. The block members (10, 11) have dimensions suitable to be easily gripped with the hands by a children, and may be provided with differently coloured surfaces to offer different tactile, visual and sound sensations during the game.
