Abstract (en)  
[origin: CA2668175A1] In the case of a method for dividing metal strip, by means of shears (1) for dividing up metal strips (7) transversely in relation to the strip running direction in strip plants, wherein an upper cutter carrier (4) and a lower cutter carrier (2) on one side have an upper cutter (5) and a lower cutter (3) and on the other side are mounted on a common rotational spindle (6) and the metal strip (7) is at a standstill during the cutting operation, and wherein the upper cutter is formed in a stationary manner and the lower cutter is formed in a movable manner, the lower cutter (3) performs an arcuate movement towards the stationary upper cutter (5). The invention also relates to a device for carrying out the method according to the invention.
