Abstract (en)

[origin: WO2008055516A1] The invention relates to an apparatus for perforating, scoring or punching for rotary printing presses having at least one printing and/or varnishing unit (2) which has a blanket cylinder (3) with a holding device (11, 12) for a rubber blanket, wherein the blanket cylinder (3) has a cylinder channel (13), in which the holding device (11, 12) is accommodated at least partially, and having a base sheet (18), to which elevated processing profiles (19) can be applied, in particular can be adhesively bonded, as perforating and/or scoring and/or punching profiles in accordance with predefinable perforating and/or scoring and/or punching formes. According to the invention, the base sheet (18) is likewise fixed to the holding device (11, 12).
