Abstract (en)
[origin: WO2008036382A2] The storing device comprises a segment of a mesh material and an end for securing the mesh material. The secured mesh material is suitable for storing various items. The food product comprises a cooking apparatus and a foodstuff. The cooking apparatus comprises a steam permeable component for steam cooking a foodstuff. The cooking apparatus may further comprise a bag and/or a packet for steaming the foodstuff. The cooking apparatus allows concurrent steaming of the steam permeable component and the packet and/or the bag for steaming the foodstuff to substantial simultaneous steaming completion.
