Abstract (en)

[origin: WO2008063087A1] The invention relates to a drinking vessel for a drinks packaging product wherein the drinking vessel comprises at least two parts. The two parts include a main vessel part and a part adapted to seal a bottle or similar container. The part adapted to seal the bottle includes a threaded portion and a seal. The threaded portion can comprise part of a base, or it can be a threaded sleeve or cap configured to engage with the base. The drinking vessel is sized and shaped to fit at least partially over the bottle and to provide a vessel from which the contents of the bottle can be consumed.
