Abstract (en)

[origin: WO2008067896A1] The invention relates to an insertable pipe end sleeve comprising a bead (5). At least one annular bead insert (6) is disposed in the inward-facing interior of said bead (5). The sleeve is characterized in that the bead insert (6) has a conical cross-section (7) along at least some of the radially outward circumferential area thereof while the bead (5) has a conical shape relative to the center axis of the pipe end (2) in at least one zone of the radially internal wall (9), said zone facing the bead insert (6).
