Abstract (en)
[origin: WO2008055551A1] In a heating or cooling system having a heat generator or a cooler, with a pump, a distributor for distributing the heating or cooling carrier medium to the heating or cooling surfaces, and possibly further heat or cold transmitting elements, having a collector for collecting the heating or cooling carrier medium from the heating or cooling surfaces, and possibly from further heat or cold transmitting elements, and having a flow control valve, a flow control valve is disposed in each heating or cooling circuit for increasing the control accuracy of the room temperature control system, wherein the flow control valves are disposed on the distributor or collector.
