Abstract (en)
[origin: WO2008055798A2] Disclosed is an ice dispenser for a refrigerator, comprising an ice passageway (9) and a flap (18) that is provided with a heater (45) and is movable between a neutral position, in which an internal face of the flap (18) rests against the edge (23) of an outlet of the ice passageway (9), and a discharge position in which the flap (18) is removed from the outlet. The heater (45) encompasses a heating coil (46) which adjoins the internal face and extends along the edge (23) of the outlet in the neutral position, and at least one heating conductor (48, 49) that adjoins the external face of the flap (18), said external face facing away from the ice passageway.
