Abstract (en)

[origin: WO2008065264A1] The invention relates to a portable so-called first electronic entity (100) comprising connection means (105) to a host station and a memory (120) for storing the commands of an application (121) that can be at least partially downloaded on said host station, that can be executed by said host station and that can co-operate with a server connected to the host station for customising a portable so-called second electronic entity (100). In some embodiments, the second electronic entity is the first electronic entity. In some embodiments, the application is at least partially executed by the first portable electronic entity.
