Abstract (en)
[origin: EP2087809A2] The package (1) has a bag delimiting a pouch (3), where a closed internal volume of the pouch is accessible via an access inlet (5) closed by a closing unit (15) e.g. safety adhesive. A flap (16) is superimposed on the bag for delimiting a passage gusset (17) for head of a person. The gusset is projected into an opening (19). The bag and the flap are respectively extended on both sides of the opening. The opening ensures passage of the head, when the flap and the bag are separated from each other.
