Abstract (en)
A sleeping bag having a length and a width and comprising: a closure comprising a first portion and a second portion, which portions are moveable between an open position and a closed position; and a closure fastener for fastening the first and second portions in the closed position, wherein the closure fastener comprises first and second attracting magnets, the first magnet being associated with the first portion, and the second magnet being associated with the second portion, the magnets being positioned such that when the portions are in, or close to, the closed position, the first and second magnets attract one another thereby holding the portions in the closed position.
