Abstract (en)

[origin: EP2087975A1] The device has a molding press (100) which has two pressing elements (22,22',24,24'). A loading device is provided for loading the molding press with body sections (4,4'). The loading device has a conveyer system (10,11,12) for promoting the body sections. The molding press is a horizontal or vertical molding press. An independent claim is included for a method for joining and pressing of body sections to a cabinet body.
