Abstract (en)

[origin: EP2087976A1] A unit (5) extracts wood chips, fibers or other similar material (2) from a bunker (3). The material is scattered onto a conveyor belt (9) to make a particle board. In novel design, the chute (6) is magnetic or can be magnetized. It is constructed as an electromagnet. Alternatively it is a permanently-magnetic material, being especially magnesium-neodymium based. The angle of the chute (alpha) is adjustable.
