Abstract (en)
[origin: DE102005047745A1] The crane (4) has a truck, a revolving super structure and a jib arranged in a super structure. The superstructure is connected to the truck by a rotary connection. Crawlers are arranged parallel to each other at two sides of a centre piece (6). Four supports (17-20) are connected with the truck. The arrangements of the supports are fixed such that two of the supports are aligned longitudinal to a driving direction within a track of the truck and other two supports are aligned transverse to the driving direction outside the track of the truck.
