Abstract (en)

[origin: EP2088275A2] The side sealing profile (10) has an attached section (13) which has fixing sections. A connecting section (13c) connects the end sections with each other. A covering section (14) is attached at the connecting section in a fixed manner. The covering section is manufactured from an elastic material. The covering section is extended to the longitudinal extension of the attached section in a parallel manner. A clamping protection section (11) is formed at the attached section. An independent claim is included for a sliding door system with a sliding blade.
