Abstract (en)

[origin: EP2088276A2] The profile arrangement has four profiles (1,2,3,4) which are connected with insulation webs (11,12,13,14) in a respective manner. An insulating body (21) is attached at the arrangement of the former and latter profiles and the insulation web. Another insulating body (22) is attached at the arrangement of the third and fourth profiles and the insulation web. The insulating bodies have a gap (S) between the bodies with closed window or door. An independent claim is included for a door frame and a window frame arrangement with an insulating body.
