Abstract (en)
[origin: EP2088277A2] The arrangement has a sealing strip (30) comprising an elastomer sealing unit and supported in a housing (15) in a liftable and lowerable manner by a lowering device (50). The device has an operating rod (51) and a lifting unit, where the rod is movable in a longitudinal direction of the housing. The lifting unit is connected with the strip and has a connection lever (56) and a control lever (71). The connection lever is connected to the housing and the strip with respective free ends, and the control lever is connected to the rod and the connection lever with respective free ends.
