Abstract (en)

[origin: WO2008055074A2] The present application is directed to electrical connectors that are connected to cartridges for use in image forming devices. The electrical connectors may form a communication path between the cartridge and the image forming device. The electrical connectors may include a circuit board and a housing. The housing may be configured to guide the circuit board into engagement with a corresponding connector on the image forming device. The electrical connectors may be positioned on a body of the cartridge.
