Abstract (en)

[origin: EP2090434A1] The method involves indicating the adjustment of color zone positioning elements or the adjustment of damp zone positioning elements on the monitor with the print image such that columns (11) or bars are superimposed for indicating the adjustment of color zone positioning elements or for indicating the adjustment damp zone positioning elements or for indicating the color density in the area of the print image. A printing ink quantity and a damp central quantity are adjusted with the respective color zone positioning elements or damp zone positioning elements.
