Abstract (en)
[origin: EP2090437A2] The system has a control panel (16) for controlling functionality of all equipments e.g. roller changer (10) and four printing units (11-14), of a printing machine. A mobile operator device (19) i.e. touch screen, associated with the equipments controls the functionality of the equipments based on an actual user and/or on actual location. The device comprises an identification unit for identifying the user to provide a user specific functional volume based on the user. The device provides the volume and/or a location specific functional volume based on the user and/or based on the location.
