Abstract (en)

[origin: EP2090488A2] The fastening device has a folding system (9) which is folded forward or backward. A spring (15) is provided, where the spring force of the spring is limited such that the folding system is automatically folded forward from a folded-back position (6a) during an unoccupied condition of a vehicle seat (6). An independent claim is included for a rail vehicle, particularly locomotive.
