Abstract (en)
The invention refers to a ceiling (1) comprising a first set (2) of a plurality of tiles (4a, 4b) and a second set (3) of a plurality of tiles (4c). The tiles in said first set are consecutively arranged, forming along at least one wall (101) in a room a row (61-64) of tiles (4a, 4b) having the width of a single tile. The first set forms a perimeter (7) arranged in a plane different from a plane of the second set. Further, the perimeter has a free edge (11 a) facing the room overlapping a free edge (11b) of the second set of tiles facing the wall. The invention also refers to a method of arranging a ceiling (1).
