Abstract (en)

[origin: EP2090721A1] The support (1) has a support plate (5) on which a wooden post (8) rests and including guiding boreholes (13) for fixing the post by wooden screws (9). A support tube is centrally provided at a lower side of the plate and extended into a clamping tube (22) of a support base in a mounted condition. The plate has a lower base plate and upper mounting plates (3, 4) that lie on top of each other and form a sandwich-support plate. The boreholes are suitable for plumb lines and are provided in the lower base plate. The boreholes retrofit in the plates (3, 4) and form a common guiding length. Independent claims are also included for the following: (1) a method for manufacturing a post support (2) a method for fixing of a post on a post support (3) a method for positioning of a wooden post in/at ground.
