Abstract (en)
[origin: EP2090736A1] The shutter (1) has a number of slats (2) rollable on a rotatable roll shaft (6) and forming a slat curtain. A coupling piece (8) is fixed in a channel (7) at the roll shaft. The slats are retained at the coupling piece, which is pivotable in a radial direction of the roll shaft, where the coupling piece is encompassed by the channel at opposite sides in U-shape. A channel wall extends in the radial direction of the roll shaft than in a side of the channel. The coupling piece is lockably fixed by a screw, and a belt strap (9) is fixed at the coupling piece.
