Abstract (en)
[origin: EP2090744A1] The trolley (13) has height-adjustable lifting legs (51), and two trussed beams (53, 53') for connecting the lifting legs, where the legs have fastening flanges (75) on three sides. Transverse beams (43) are screwed with the trussed beams for connecting the trussed beams with one another. The transverse beams are made from transverse beam rods (40.1-40.4) that are screwed among each other, where the rods comprise steel sections with an upper belt (44) and a lower belt (46). Trussed bars are provided at the trussed beams and comprise a perforation with borings in grid spacing.
