Abstract (en)

A cooling appliance (A) having a bottle support (1), which is defined by a first and a second portion (3, 4) connected by a hinge (12) to rotate, with respect to each other and about a first axis (13), between an extended position, in which the first and second portion (3, 4) are aligned and define a seat (1a) for housing a bottle (2), and a scissored fold-up position; the first portion (3) having a fastening member (6), by which the first portion (3) rotates, in use, about a fixed second axis (7), parallel to the first axis (13), so as to be positioned horizontally in the extended position, and vertically in the fold-up position.
