Abstract (en)
[origin: WO2008046482A1] The invention relates to a cleaning container (1) for a cleaning device (4) comprising a handle (6) and a cleaning head (5), in particular for a lavatory brush. Said cleaning container (1) comprises a primary compartment (3) for cleaning and storing the cleaning device (4), in addition to a secondary compartment (13), which is connected to the primary compartment (3) via a passage (16) and which contains a unit for applying a cleaning fluid to the cleaning device (4) in the primary compartment (3). To guarantee a hygienic, simple operation, in particular when the cleaning container (1) is emptied and cleaned, according to the invention the primary compartment (3) and secondary compartment (13) are designed as separate container elements (2, 12) that are detachably interconnected.
