Abstract (en)

[origin: WO2008055662A1] A device for a container for molten metal, particularly nonferrous molten metal, is equipped with at least one locking unit for closing and opening a pouring canal (4), wherein the locking unit can be mounted on at least one outlet (2) of the container (1). A protective cap (10) is provided, which covers the outlet (2) in an enclosing manner and which can be attached to the container (1). The protective cap (10) is configured in the shape of a lid and encompasses both the outlet (2) and the locking unit closing this outlet. In this manner, such a container can be safely transported, even on an ordinary road.
