Abstract (en)

[origin: DE202006017870U1] The door hinge has a door support (3) mounted on a door and a frame support (2) mounted on the door frame that are formed so as to be able to pivot relative to each other about a common axis of rotation (4). The door support and the frame support are of identical construction and can equally be used for left and right doors. A height adjustment device can be mounted on the frame support or door support.
