Abstract (en)
[origin: EP2092850A1] The fitting (12) has a support arm (26) that is pivotably supported at a shelf board (21) in a bearing position (25) and around a pivot axle (24) fixed in a fitted condition of the board to support the board. A control device (39) controls a movement of the board between inner and outer positions. The device includes two control-single levers (40, 41) that are pivotably supported around fixed joint axles (42, 43) and around a shelf board-fixed pivot axles (44, 45) in the fitted condition of the board. The axles (44, 45) are arranged at a side of the board with respect to the bearing position.
