Abstract (en)

[origin: EP2093161A1] The unit (2) has planar elements (4, 6) arranged on each other to form a closed chamber (12) between the elements. The elements are joined to each other in a collar region (14) encircling the chamber. The chamber has an opening unit (22) that is provided on a side of the chamber facing away from an edge section (18) of an outer edge (16). The collar region has a support section (32) that is deflectable from an initial position about a deflection region away from the opening unit into a supporting position in which the support section and the edge section together form a spaced-apart leg unit.
