Abstract (en)

[origin: EP2093787A1] The part (1) has a plate shaped carrier (6) made of insulation material with an electrical conductor, where ends of the conductor are designed as electrical contact pins (7, 8) for producing a direct electrical connection with connecting terminals (4, 5) that are formed as screw connection terminal and spring type terminal, respectively. The pins (7, 8) runs perpendicular and parallel to the plane for connection at the connecting terminals, respectively, where the plane determines the plate shape of the carrier. The conductor is formed as a wire covered with plastic.
