Abstract (en)
[origin: EP2093852A1] The radio has a support ring (37) fastened at a housing-upper part (30), and a main-conductor plate (18) with a layer located by a support platform (24) in a housing-lower part (23) and walls (34) of the upper part. A layer of a receiver/amplifier-conductor plate (13) is located by a support platform (27) in the lower part and plates (32) of the upper part, where the plates are dipped in the lower part. A central disk and a cover frame are selected by a desired program for completing a flush-mounted radio-appliance base (1).
