Abstract (en)

[origin: WO2008077996A2] The present invention relates to a method, an apparatus and a system for determining a need for growth aids to promote vegetation growth. The method comprises receiving an image, an identification code, and optionally an image attribute, analysing the image, determining vegetation indices, sending a selected pre-determined message and/or vegetation status information to a recipient. The method provides an easy and fast method for determining the need of growth aids based on analysis of received images.
