Abstract (en)

[origin: WO2008067612A1] A mollusc spat collection and growing medium (112) including a collection and growing mesh (130) having a longitudinal axis, said mesh (130) having a plurality of transversely spaced longitudinal strands (232) extending parallel to said adjacent longitudinal axis and having spacing means (234) for spacing adjacent longitudinal strands (232), wherein the transverse spacing of said adjacent longitudinal strands (232) is substantially unaffected by application of a longitudinal load, whereby in use any spat (136) collected or growing upon the medium (112) remain transversely spaced as said spat (136) grow, thereby optimizing growing conditions.
