Abstract (en)

[origin: DE102006050167A1] The wind screen wiper device has a wiper motor inserted in a housing base body (1). The housing base body has a section, which is provided with a plug (4a,4b) for supplying power to the wiper motor. The section is designed to rotate for realising different plug positions relative to the housing base body and has a fastening unit (5), with which the plug is mounted or fixed in different positions on the housing base body.
