Abstract (en)

[origin: WO2008075144A1] The process for wrapping palletised loads comprises the steps consisting in: - supplying a first palletised load with one first load to wrap placed on top of a first pallet; - supplying a second palletised load with one second load to wrap placed on top of a second pallet; - positioning the first and the second palletised loads in a wrapping configuration wherein the first and the second pallets are side by side and approached inside a wrapping station suitable for wrapping the palletised loads with a covering sheet that has a longitudinal edge substantially rolled up on itself to form a reinforcement border; - winding once or several times the covering sheet around the first and the second palletised loads in the wrapping configuration, tightening the reinforcement border around the first and the second pallets to form one or more turns to hold the pallets firmly together.
