Abstract (en)

[origin: WO2008071265A1] In order to increase the capacity of a drying turret (13) for cigarette packs (10), units made up of a plurality of pockets (14, 15), which are moved alternately into a charging position and an emptying position, are arranged on the circumference. This increases the residence time of the packs (10) in the drying turret (13) in accordance with the number of pockets (14, 15) per unit.
