Abstract (en)
[origin: US8104643B2] A fluid dispenser device having: a fluid dispenser member such as a manually-actuated pump or valve, the fluid dispenser member being fastened by a fastener ring on a reservoir; an actuator head that is mounted on the dispenser member, and that is movable so as to actuate the dispenser member; and a removable blocking element that, in its blocking position, prevents the dispenser member from being actuated. The blocking element is assembled to the actuator head and co-operates with the fastener ring, or with an element that is secured thereto, through at least one opening that is provided in the actuator head.
