Abstract (en)  
[origin: WO2008074667A1] The present invention relates to cleaning compositions, to their preparation, to cleaning methods and to processes for enhancing the retention of cleaning agents into carriers. More specifically, the invention relates to cleaning compositions for use in hand dishwashing. It is an object to provide a cleaning composition with enhanced retention of its cleaning agents (surfactants) in a carrier when being diluted. It has now been found that an improved and economical dilution thickening system may be obtained by a dilution-thickening surfactant system.
