Abstract (en)  
[origin: WO2008073052A1] Drying cabinet having a drying chamber, which is intended to accommodate objects installed for drying by means of flows of heated air in the drying chamber and is provided with air inlets (14, 28) to the drying chamber and air outlets from the drying chamber. A fan device drives the air flows through the drying chamber, which is delimited by three wall portions, consisting of two side wall portions (1, 2) and a rear wall portion (3), a bottom portion (7), a roof portion (4) and a front portion (5) having a door (6) for opening and closing of the drying chamber. The bottom portion (7) forms an outlet box, to which the outlet leads for through-flow of the outlet air.
