Abstract (en)
[origin: WO2008068221A1] The invention relates to a steam iron, comprising a steam chamber (4) for generating steam for ironing, a water container (3), which is associated with the steam chamber, a water feed opening (23), which can be hermetically sealed by means of a locking element (6) and comprises at least one water container vent opening (36a, 36b), a pressure compensating system (5), which comprises at least one vent line (50a, 50b), which is connected to a first end section (51a) with the at least one water container vent opening (36a, 36b), and a first air inlet/air outlet opening (53a), via which a first spaced end section (52a) of the at least one vent line (50a, 50b) is connected to the outside of the water container for compensating air pressure differences between the inside and the outside of the water container.
