Abstract (en)

[origin: WO2008061768A2] The invention relates to a bearing shell (26) for a hydrostatic machine, especially an axial piston machine (1), said bearing shell comprising a fixing element (27a) for fixing the bearing shell (26) that has the shape of an annular sector in the mounting position. In order to improve the bearing shell in terms of a simple construction and assembly or disassembly, the bearing shell (26) consists of a plastic material and the fixing element (27a) is integrally formed thereto.
