Abstract (en)
[origin: WO2008068585A2] The present invention relates to a household cooking top (10), in particular made of glass, of the type comprising: - a plurality of burners (20), in particular gas burners, - a plurality of fitting disks (30) for securing each burner (20) to the cooking top (10), said fitting disks (30) being in relief from the surface of the cooking top (10), - one or more support (stand) elements (40, 41, 42) for laying at least one cooking container over said plurality of burners (20). The present invention is characterized in that said one or more stand elements (40, 41, 42) comprise constraining means (43, 44, 45, 47) which are coupled to at least two fitting disks (30), thus preventing said one or more stand elements (40, 41, 42) from translating relative to the cooking top (10).
