Abstract (en)  
[origin: FR2910612A1] The bomb (1) has a cylindrical hollow penetrating body (10) containing an active material (20). A cylindrical aerodynamic outer cover (60) has identical thermoformed longitudinal elements (62) and a thin protection covering (80). The cover is integrally fixed to the body, and extended along length of the body. The cover has an outer profile, mass and a spatial arrangement around the body such that the bomb equipped with the cover possesses dimensional, volume, mechanical, aerodynamic and inertial characteristics similar to that of a qualified general purpose bomb e.g. Mark 82 bomb.
