Abstract (en)
[origin: WO2008064775A2] The invention relates to a method for determining the vehicle speed of a motor vehicle, according to which a provisional first speed value is determined for high speeds and a provisional second speed value is determined for low speeds, and the vehicle speed is determined according to the determined provisional first speed value either from the provisional first speed value or the provisional second speed value or from a combination of the first and second speed values.
